

Chest Seal

What is a chest seal?

- A clear bandage with strong glue used for chest wounds

Use a Chest Seal on a chest wound

Air: If you hear **air**.

Bubbles: If you see or hear **bubbles**.

Chest seal

Remember that injuries to the body:

- Can be on the front, back, or sides of the chest.
- May have more than one opening in the chest if due to gunshots.

Steps to apply a chest seal

1. Dry the skin if possible around the wound.
2. Center the sticky side down over the wound (i.e. hole).
3. Apply and press the chest seal to the skin.
